SUMMARY

M.Tech Data Science student at Christ University, Bangalore, with industry experience at Publicis Sapient and Bluestock Fintech. Builds across Python, React, and Node.js—from ML research to production code.

SKILLS

Languages: Python, JavaScript, TypeScript, SQL

Frameworks: React, Next.js, Node.js, FastAPI

Tools: Git, Docker, PostgreSQL, Supabase, GitHub Actions

EXPERIENCE

SDE Intern · Bluestock Fintech, Remote

May 2025 - Jun 2025

- Designed and implemented RESTful API endpoints using FastAPI to serve structured financial datasets, integrating data quality checks and anomaly detection to flag irregular patterns in financial records.
- Applied statistical techniques to surface patterns and hypotheses from IPO timeline data, visualized through an interactive investor dashboard.

Junior Associate Technology L1 · Publicis Sapient, Bangalore

Jan 2021 - Apr 2023

- Architected RESTful integrations connecting back - end data services to analytics - facing front - end interfaces for clean, reliable data interchange using Node.js and React.
- Selected SQL and Python to explore structured datasets, surface actionable insights, and present findings directly to stakeholders.

EDUCATION

M.Tech-Data Science · Christ University

2024 - 2026

- GPA: 3.74 / 4.20

PROJECTS

Atsprime.in · Next.js, Supabase, OpenAI API

- Designed and developed a full-stack AI resume platform featuring ATS score analysis, AI-powered resume optimization, secure authentication, PDF generation, and job-specific resume customization.
